

MYKHAILO TRUNOV

Senior Front-end Engineer | Poland | [LinkedIn](#)

SUMMARY

Senior Front-end Engineer with expertise in React, JS, performance optimization, and CI/CD. Skilled in building scalable, high-performance web applications, onboarding and mentoring new engineers, and delivering prototypes showcased at international conferences (IBC/NAB) and to enterprise customers. Experienced in leading Agile meetings and driving efficient, collaborative software delivery.

SKILLS

Main Hard Skills	React, JS, Docker, GitLab CI/CD
Emerging Skills	TS, Jest, Nginx
Soft Skills	Communication, Collaboration, Problem-Solving, Conflict Resolution, Critical Thinking

EXPERIENCE

Senior Front-end Engineer & Scrum Master @ Avid | Poland **05.2024 - Present**
Role Focus:

Front-end Development:

- Designed and delivered scalable React components and APIs, improving feature development speed and maintainability.
- Built CI/CD pipelines (GitLab, Docker), reducing deployment time and ensuring reliable releases.
- Improved Webpack builds (hashing, compression), reducing load times and enhancing customer experience.
- Covered code by unit tests to ensure code reliability.
- Created prototypes to showcase new features/products at public conferences (IBC) and customer presentations.

Scrum Master:

- Run Agile meetings, including daily stand-ups, backlog groomings, sprint plannings, demos, retrospectives, etc.
- Reviewed and decomposed complex tasks into manageable user stories and estimated them.
- Generated sprint reports and communicated results to stakeholders.
- Collaborated with release managers, POs, and development teams to coordinate smooth releases of new application versions.

Key Results:

- Developed a prototype to evaluate the integration of the Microsoft Graph API into our app, leading stakeholders to approve its adoption. Collaborated with the Microsoft product team to clarify beta API, and successfully delivered new features powered by the integration.

Senior Front-end Engineer @ GlobalLogic | Ukraine, Kyiv
Role Focus:

04.2022 - 05.2024

- Implemented new features using React, JS, TS.
- Maintained back-end services on JS, TS.
- Unit tests created.

- Set up and maintain CI/CD pipelines in GitLab CI.
- Used Webpack for optimized build creation.
- Used Docker and NPM registries for containerization, publishing, and deployment processes.
- Created documentation - describe reusable components, API, etc.
- Reviewed feature descriptions and created Stories/Tasks.
- Participated in meetings - standup, planning, grooming, demonstrating, etc.
- Collaborated with teams, front-end, back-end, design, DevOps, management, etc.

Key Results:

- Created UI prototypes and integrated them with AI-powered services for the [IBC2023](#). Check [VIDEO](#).

Front-end Engineer @ GlobalLogic | Ukraine, Kyiv

08.2020 - 04.2022

Role Focus:

- Main stack – JS, ReactJS.

Senior Test Engineer @ GlobalLogic | Ukraine, Kyiv

07.2019 - 08.2020

Role Focus:

- Main stack – Groovy, Java, GitLab CI/CD, JUnit, Rest Assured, Docker.

Key Results:

- Created Visual tests for reusable React components from scratch.
- Created Performance tests using Gatling + Scala from scratch.
- Created environment to test UI features against Canary Chrome from scratch.

Software Test Engineer @ AB Soft | Ukraine, Odesa

05.2017 - 07.2019

Role Focus:

- Main stack – Java, TestNG, Jenkins.
- Created and supported UI auto-tests. Reported bugs. Communicated with other teams

EDUCATION

Master's degree of Business Project Management, Lviv Polytechnic National University
